

## Recommended question sheet – Coronavirus infection

The Norwegian Armed Forces have to take precautions not to introduce SARS CoV-2 to military facilities or exercise-areas during CR 2020. We therefore urge all personnel travelling from an area with ongoing transmission in the last 14 days, or who have symptoms of respiratory tract infection (fever, cough, chest pain or breathing difficulties) to identify themselves to their superiors. The Norwegian Armed Forces Joint Medical Services (NAFJMS) recommend asking the following questions of all personnel entering Norwegian territory:

- **Have you, in the past 14 days, been in a region affected by the coronavirus?**
  
  - **Have you, in the past 14 days, had contact with someone you believe might be infected by the coronavirus (covid-19)?**
  
  - **Do you know of any confirmed cases of coronavirus infection in your family, at work, or in any other of your social circles?**
- ➔ *If the answer to any of these questions is yes, proper action needs to be taken.*
- **Have you, in the past 14 days, been affected by fever, coughing or breathing difficulties?**
